GIFT GUIDE from page 45 |

SABO JIG HEAD SYSTEM

An abrasion- and chip-resistant acrylic outer layer houses and protects the vibrant colors and glow material from chipping and flaking off. Quality, razor-sharp hooks, 3-D eyes, and rich glow material are standard. Twice the size of standard lead-heads but without twice the weight, the larger head offers a more uniform and streamline appearance when rigged with swim-baits.

Sabo Squids can be rigged with a plethora of lures. Simply cut the upper half of the squid lure off, and thread a Sabo Squid Head in its place. They're also deadly when rigged with a couple strips of squid.

The oversized Sabo Bullet Head jig heads are embedded with super glow elements that extend deep into the head, emitting a brighter, longer-lasting glow. They're great for trolling or casting curly tails, grubs, and hoochies.

Sabo Heads are available in tackle stores. For info call (866) 264-1562 toll free, or visit at www.AhiUSA.com
